

Assessed product - Display it with Byggvarubedömningen's symbol

**You have just had one of your products assessed by Byggvarubedömningen!
Now our users and your customers can find your assessed product in our Web Service.**

As your product has been assessed, you hereby receive Byggvarubedömningen's assessment symbol. You can use the assessment symbol to display that your product has been assessed, for example on your website.

What you need to consider before displaying the assessment symbol is:

- ❖ It must be clear to which product the assessment symbol belongs.
- ❖ That you show the assessment symbol that belongs to the current assessment. This means that if your product has received the assessment "Accepted" (yellow) on Total, you must display that assessment symbol for your product, see picture below as example.

- ❖ That you refer to that Byggvarubedömningen has made the assessment and that more information about the assessment can be found in Byggvarubedömningen's Web Service.
- ❖ That you are responsible for ensuring that you always display the latest update of the assessment symbol for the actual product. That is, if the assessment symbol (color) for your product is changed, you must make sure to replace the symbol on your website.
- ❖ Welcome to contact us at Byggvarubedömningen if you are unsure of how you can use the assessment symbol. For publication of information other than the assessment symbol, you must seek special approval from us.

Thank you for choosing Byggvarubedömningen. Together, we make it easier to build sustainably.

Best wishes from
